## About Earth's Ultimate Conflict

What if the threat of a world-wide pandemic, increased seismic activity, and global warming, were all linked to alien abduction?

In the near future this frightening scenario forces thousands including Rosa De Angelo to flee Earth with her three alien hybrid children. In doing so she leaves behind Tony, her soul-mate and husband. While Ellen McCarthy is faced with the agonizing choice of abandoning her love-starved hybrid children or finding a way back to her three-month-old human child Griffin, before it's too late.

While Earth's inhabitants are faced with seemingly insurmountable illness and destruction, two rival alien species offer them salvation. The United States President Barbara Unger will make the ultimate decision of who to trust – the Grays or the Guardians.

*"I will always hold [Earth's Ultimate Conflict] close to my heart."*

**Ray Bradbury**

*"In the tradition of the creepiest works of Stephen King and other writers of horrific science fiction, Earth's Ultimate Conflict by Kathy Porter brings our very real collective fears home to rest in a personal way that literally gets under our skin, inside our bodies, and finally into our hearts and minds until there is no place left to run and no place left to hide."*
